久長門跡

Kyuchu-Mon(Kyuchu Gate)Site

It used to be in the eastern part of the middle area of the castle grounds, and was named after the place where it existed. Both the outer and the inner gates faced the east. The outer gate was a Korai gate with a transverse roof and with gabled walls ascending from the two main pillars and projecting a few feet in front of the gate. The inner gate was a corridor gate with a storage on top. Just inside the outer gate there used to be a watchhouse. The square surrounded by the stone walls prevented the enemy from coming into the castle grounds smoothly.

INFORMATION

The Special National Historic Site Of HIMEJI Castle

The site of Himeji Castle is designated as a Special National Historic Site. It almost covers the area inside middle moat.

The south part of the middle moat was filled in and now Route 2 runs along part of it, but other parts of the moat, earthenworks and stone ramparts still retain their original form.

久長門跡は、姫路城跡の東部の中央部にあり、外門と内門が東向きに設けられていた。外門は、横長の屋根と、二つの柱から立ち上がり、門の前方に数メートル突き出た、廊下式の門であった。内門は、通路式の門で、その上には倉庫が設けられていた。外門のすぐ内側には、見張り所があった。石垣で囲まれたこの四角形は、敵軍が容易に城の内部に入ることができず、城の防衛に重要な役割を果たしていた。

特別史跡姫路城跡案内図は、姫路城跡の全体的な配置と、各主要な遺構の位置を示しています。また、城の周囲には、堀や土塁、石垣などの防衛施設も残っています。この案内図は、城跡の見学や研究に大変役立つ資料となっています。

Kyucho-Mon(Kyuchō Gate)Site

It stood to the east of the middle area of the castle grounds and was named after the place where it opened. Both the outer and the inner gates faced the east. The outer gate was a Kasei gate with a transverse roof and with its roof eaves extending from the two main pillars and projecting a few feet in front of the gate. The inner gate was a corridor gate with a storage room. Just inside the inner gate there used to be a courtyard. The square surrounded by the stone walls prevented the enemy from coming into the castle grounds directly.
